

Advisory and Managed Services

Data security. It's been around for decades, so why does it still feel like an unsolvable puzzle? Security teams are tired of spinning their wheels with tools that either drown them in false positives or require a PhD in regex just to function.

That's where Concentric AI comes in. Our Semantic Intelligence platform helps you cut through the chaos by answering three fundamental questions:

- What data do I have?
- Where is it located?
- Who has access?

Unlike other tools, our solution doesn't rely on agents, complex rules, or regular expressions that make your brain hurt. But here's where things get really cool: Our AI doesn't just scan content – it understands context. That means it can identify your most sensitive data, including intellectual property and business critical documents with shocking accuracy.

Once you know what's what, you can move sensitive data, clean up duplicates, apply classification labels, and set access policies, all within our platform.

Sounds amazing, right? There's just one little problem. Your team's juggling more point products than a circus act. Adding yet another tool? Sure, if you had unlimited time, a team of experts, and maybe a clone of yourself to manage it all.

Luckily, we've got a solution for that too.

Key Benefits

Top-tier support – From setup to security wins, we're with you

Easy training – No boring manuals, just real, useful guidance

Security strategy, simplified – We help you build a solid plan

Total data clarity – Find it, secure it, breathe easy

Proactive protection – Spot risks before they turn into disasters

Minimal disruption – Protect data without annoying your users

Effortless classification – No stress, no confusion, just results

Smooth integrations – Works with Microsoft Purview and other existing tools

At Concentric AI, we don't just hand you a platform, give you a thumbs up, and disappear until renewal time. **We're in this with you.** Our customer success team works alongside you to make sure you get real results. Not sure where to start? No worries – most teams don't. That's why our security pros are here to guide you, helping you build a data security plan that actually makes sense.

Here's What You Get With Us

Quick start: Connect to your cloud and on-prem data in minutes

Training that clicks: Learn how to make the most of your data and use the platform like a pro

Smart data discovery: Find and label what's unique to your org

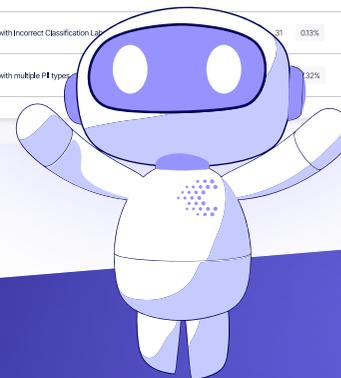

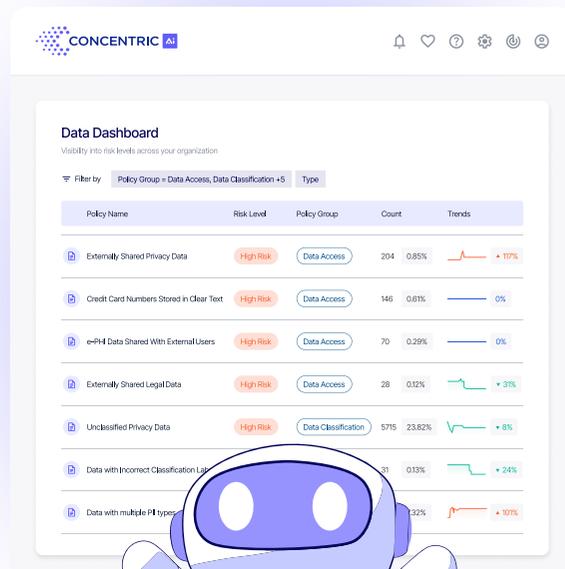

Risk insights: Proactively identify security gaps

Secure data without breaking workflows: Remediate risks the right way – with recommendations, policy tuning, and on-demand fixes that won't slow down your users

Smarter classification: Get expert help mapping classification labels, deploying them across tools like O365, and keeping track of how well they are working

Regular check-ins: Keep improving with ongoing strategy sessions

Reporting, your way: Stay informed with standard, custom quarterly, or on-demand reports

The Happy Ending

Faster ROI, smarter policies, and a whole lot less stress – all backed by our team of data security experts. You get world-class support without losing control. Now, doesn't that sound nice?

About Concentric AI

Concentric AI is intelligent data security made easy. Our platform discovers, classifies, monitors risk, and protects data across cloud and on-premises environments. With AI-driven insights and co-managed services, we help businesses reduce risk, streamline compliance, and eliminate duplicate data records – transforming data from a liability into a well-managed asset.
